OUR LATEST SUCCESS

We are delighted to have been officially certified by Rockwell as a Recognised System Integrator for Information and MES Pharmasuite since January 2019.

Further information:

<https://www.meyer-eng.ch/systeme-zertifizierungen/mes/>

HME & Rockwell Pharmasuite

Use of an MES system forms the basis for **paperless, cGMP-compliant production**. This is associated with a **significant increase in quality and efficiency** in all production, documentation and quality assurance processes.

We have been supporting our clients for many years in evaluating and planning MES systems, and can also take on full implementation. From control level via the MES through to corporate management level, we plan and implement all necessary interfaces (for example, to ERP, DH and SCADA systems).

“We are pleased to welcome Hans Meyer Engineering AG to the group of SIs.

HME specialises in automation in regulated environments with a focus on pharma, biotech and chemistry.”

Rockwell Industry News 1-2019

Thanks to our extensive experience with MES Pharmasuite, we have been certified by Rockwell as an official integrator for MES Pharmasuite since the beginning of 2019, making HME the only official Pharmasuite System Integrator in Switzerland.

We are looking forward to offering you even greater support with our expertise in the area of MES Pharmasuite.

HME & OSIsoft PI

Industry 4.0, Big Data and OT are just a few of the buzzwords on everyone's lips. But what does this mean for you as our customers?

Data alone are usually not very informative. We support our customers in **generating profitable information for their companies** from the ever-increasing flood of data.

We also deal intensively with topics such as **advanced analytics, machine learning, cloud solutions**, etc. in our projects.

As a certified OSIsoft PI System Integrator, we have a long track record in data intelligence, especially with regard to PI systems in the GxP environment.

Our PI specialists are also accredited by OSIsoft as PI System Infrastructure Specialists based on their many years of experience in countless PI projects.

Visit us at the OSIsoft Regional Seminar in Basel on 16 May 2019 and talk to our PI and MES experts.

With our expertise in both MES and data intelligence, we can offer you the best possible support when it comes to the integration of MES in conjunction with OSIsoft PI.

Our experts will be happy to
help

You can find an overview of
our expertise and our range
of services at:

www.meyer-eng.ch

At HME, we have been supporting our customers in all areas of automation for more than 40 years.

Since the company was founded, our activities have focused on the **life science industry**, but our customers also include companies from all other branches of industry.

In addition to classic automation, our core competencies include **data intelligence, information/operational technology (IT/OT), MES and serialisation**.

We provide you with support for both your local and international projects, from consultation to planning through to full realisation. And our support continues to be available to you at any time, even after project completion.

*From control and management level via
PI and MES through to
connections to ERP systems:*

*We relieve you of all interfaces and offer
you tailor-made solutions from a single
source.*

MEET US

Talk to our experts and management in person at one of the upcoming events.

As a system integrator, we work very closely with our partners and system suppliers. In this respect, we also take active part in relevant events with our own presentations.

Why not take the opportunity to get to know our specialists and management and start a dialogue with us? We are looking forward to it!
